## ROAD DECOMMISSIONING AND COAST CREEK DENSITY MANAGEMENT PROJECT

EA Number OR-086-00-01

The interdisciplinary team identified the need to update the following information in the Road Decommissioning and Coast Creek Density Management Project Environmental Assessment (EA Number OR-086-00-01), dated July 28, 2000. The amended text (bold font) does not alter the analysis and determination of effects as originally presented.

EA, p. Appendix 3-10:

Existing EA

ELEMENTS OF THE ENVIRONMENT	ENVIRONMENTAL EFFECTS	INTERDISCIPLINARY TEAM'S COMMENTS
Fish Species with Bureau Status	See Chapter 3 of the EA	This element was not identified as a major issue. However, refer to Chapter 3 of the EA for a discussion of the environmental effects.

Amended EA

ELEMENTS OF THE ENVIRONMENT	ENVIRONMENTAL EFFECTS	INTERDISCIPLINARY TEAM'S COMMENTS
Fish Species with Bureau Status <b>and Essential Fish Habitat</b>	See Chapter 3 of the EA	This element was not identified as a major issue. However, refer to Chapter 3 of the EA for a discussion of the environmental effects. <b>All effects described in Chapter 3, and Appendix 5 and 6, that would occur to chinook and steelhead habitat apply directly to Coho salmon (<i>O. Kisutch</i>) and Chinook salmon (<i>O. Tshawytscha</i>) Essential Fish Habitat.</b>

Rationale: This Element of the Environment is amended to reflect a recent Bureau requirement to disclose the effects of proposed actions on Essential Fish Habitat pursuant to the Magnuson-Stevens Fishery Conservation and Management Act.
